The ASAPH spectator area is at the junction of three roads in a valley, where the hills provide a natural amphitheater for spectators. The cars will approach this spectator area from the East, coming down a slight hill out of a narrow valley following the stream bed. The cars have a full 90 degree turn at the road junction immediately before they cross a bridge. As soon as they cross the bridge the road bears to the right and approaches a second bridge, which requires a slight turn to the right onto the bridge followed by a turn to the left as you come off of the bridge. In the rally car there is a lot going on in a short distance, and the concentration is so great that the competitors don't notice the spectators. Many of the spectator positions offer a great view of the action. There is a lot going on in a short distance, which with the setting makes this a great spectating area.
